

The Farm Vet Champions project brings together a community of farm animal vets, farmers and practice teams to establish and embed good antimicrobial stewardship.

The project is being led by RCVS Knowledge. We are a charity dedicated to improving the quality of veterinary medicine for the benefit of animals, the public and society. Farm Vet Champions provides access to free evidence-based online learning that will cover all types of food-producing animals encountered by veterinary professionals, within farm, mixed and GP practice.

The project aims to support the profession and to provide positive inspiration and leadership towards One Health efforts. The training also covers the principles of antimicrobial resistance, legal and responsible use of medicines, vet and farmer communication skills, behaviour, and compliance. Once signed up to Farm Vet Champions, you can start setting and tracking your own SMART goals via the SMART goal dashboard. This free, online tool is designed to help you formulate personal and team goals that are Specific, Measurable, Achievable, Realistic and Time-bound.

Join us, sign up and get involved. Take advantage of the free learning modules and help us reduce antimicrobial resistance by spreading the word for other to get involved too.

Let's fight antimicrobial resistance together.
