

Keep up to date with the latest evidence with RCVS Knowledge's open access journal, *Veterinary Evidence*.

Using Evidence to Inform the Way you Practise

As a busy veterinary professional, it can be a challenge to keep on top of the latest evidence. *Veterinary Evidence* provides free access to peer-reviewed critical summaries of the best available evidence, called Knowledge Summaries.

We can help you make informed evidence-based decisions in practice, to enhance the quality of care provided to your patients.

The next time you are in a situation where you are unsure of the evidence, search *Veterinary Evidence* to see if your information need has been answered as a Knowledge Summary.

Access for All

- Join our growing international readership who have been putting the evidence into practice since 2016.
- Enjoy free access under our diamond open access model, with no pay walls or access barriers for anyone.
- Benefit as an early career professional, with Editorial Board support and our annual *Veterinary Evidence* Student Awards.

Searchable Evidence

- Use our search functionality, or browse by species, to find the evidence relevant to your information need.
- Enhance the quality of care you provide to animals by using the evidence to inform the way you practice.

How to Contribute to the Evidence

There are two main ways you can contribute to the evidence base while also enhancing your CPD / CE:

1

Submit

Your Information Need

2

Write

a Knowledge Summary

Evidence Need

You face a clinical scenario where you are unsure of the evidence.

Evidence Check

See if your query has already been answered as a Knowledge Summary.

Evidence Absent

In the absence of a Knowledge Summary, submit your clinical query in a PICO format.

Query Added

Your clinical query is now available online to be answered as a Knowledge Summary.

New Research

New research drives the need for more evaluations of the evidence base.

Promotion

The journal promotes use of the Knowledge Summary and the need for research.

Evidence Strength

Knowledge Summaries are listed based on their strength of evidence.

Value Added

Write a Knowledge Summary and, once accepted, add value to the evidence base.

Either way, you will be helping to add to the evidence base, and strengthen the decisions that veterinary professionals around the world make to give animals the best possible care.
